

SPACE MERCENARIES

- From 2 to 4 players.
- Requires 2 dice (1 white and 1 black), 4 pencils and erasers.

Introduction

Space mercenaries is a game of programmed battles, where you can use different armaments and equipment, making each battle unique.

What is it all about?

All players will secretly buy weapons and equipment with their limited resources and create a pool in which to activate on their turn. The roll of the dice will determine how much energy you will have for the next two turns. With the energy rolled, you will program your actions for the that turn. Win the last ship in the game (You can reuse the **ship's sheets**).

MANUAL

1. Prepare the game

1.1. Hand out a **ship's sheet** to each player and determine how many  Resources players will start with:

- 15  Resources for a slow and strategic game.
- 20  Resources for an intermediate game.
- 25 to 30  Resources for a quick game.

2. Buy weapons and equipment

2.1. Everyone buys at once, but they don't show what they bought to the opponents until the first showdown begins. They can take turns buying if they wish, print more **tech's sheets** or have one buy everything and then the other, since they won't show what they bought.

2.2. Choose the weaponry and equipment of the **tech's sheets**, write the symbol on the top of the **ship's sheet** (You have a limit of purchase of 8 objects), so you already have that action to use it in the game. Buy until you spend all your  Resources.

NOTE: All players start with 4 shield but can be increased if they buy "REINFORCEMENT ARMOR".

Example: The red player finished buying, in a game of 15  Resources.

Buy "REINFORCEMENT ARMOR" add a shield to your ship. Cross out unused shields.

15  Resources

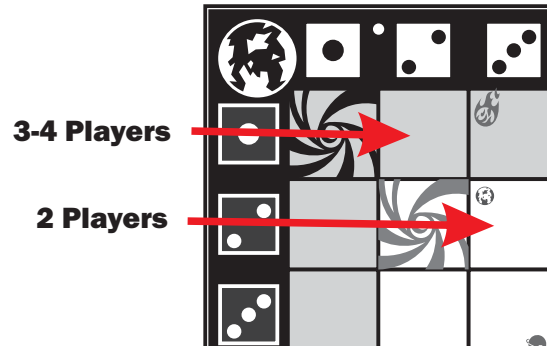

SHIP'S SHEET	 15		→	
SHIELD	○ ○ ○ ○ ○	⊗ ⊗		
				

This player can only use these skills in this game. If  Resources are left over, it is discarded.

3. Battlefield

After everyone finishes shopping, this preparation begins.

3.1. The battlefield varies if there are 2 or more players. For 2 players only the white zone will be used and for 3 to 4 players the gray zone is added. All players will appear in the portals at the corners of the map.

3.2. 1 Asteroid is placed and 2 more are added for each player. To determine the location of an Asteroid throwing the two dice (2 can be placed at the same time if it results).

3.3. Asteroids cannot be placed on a player or completely block their movement.

Example: In a game of 4 players (2 Asteroids are used for the example).

An Asteroid cannot be placed on a player.

A player's movement cannot be blocked (only the simple movement is considered)

A player's movement cannot be blocked (only the simple movement is considered)

3.4. Other symbols on the map are decorative.

4. Determine the initial player

4.1. Determine the initial player, the one who dresses with darker clothes in general begins. You are given the initial player token. (Another selection method can be used).

5. Determine the energy for 2 shifts

5.1. In traditional order, starting with the initial player, 2 dice are rolled to determine the energy of 2 turns. After these 2 turns the next player becomes the initial player and then the next player.

Example: A player throws a and a , then writes it in the order he wants on his **ship's sheet** but without showing it to other players. (In the course of the game you can exchange them, but you cannot do so if a dice was played)

EFFECTS		DICE	
	4		
	5		

5.2. You can use the EFFECTS box to write the extra ⚡ energy or the decrease caused by some enemy or own equipment or weapons.

NOTE: All players can use this action.

 SIMPLE MOVEMENT, NO REQUIRED TO BE PURCHASED IT. IT CAN BE DONE BY ALL PLAYERS	SIMPLE MOVEMENT 	1	
---	--------------------------------	----------	--

NOTE: You lose a shield if you hit another player or Asteroid during a move.

6. Actions

6.1. All players draw their actions on their **ship's sheet** in the corresponding turn. All in secret.

6.2. Each player performs 5 actions per turn that are performed in order from left to right. Be guided by the **tech's sheet** to know what each weapon or equipment does and its energy cost.

EFFECTS	DICE	ACTIONS				
	4					
	5					

Example: The red player will make a forward movement as the first action using 1 ⚡ energy (The other players also perform their first action). After he does not perform any action, he stays in the same place (The other players also perform their second action). Then the third, fourth and fifth action (The other players also perform their actions.) (Information on page 5)

6.3. The remaining ⚡ energy cannot be saved (except equipment or ⚡ energy-saving skills) if more ⚡ energy is used than you have in one turn you subtract one **shield** for each additional ⚡ energy used.

7. What action is performed first?

7.1. First the range is taken into account (It is in the upper left).

7.2. If they are of the same range, the type is taken into account (It is in the upper right).

7.3. In the draws the initial player decides which action is taken first.

Example: The red player moves a square up and the purple player moves a square to the left. Both actions have the same rank and have the same type. In this case the  initial player decides that the action of the purple player is done first (Both players lose a shield due to the clash).

8. Game simulation

Preparation 1: The players decide to play with 15  Resources.

Preparation 2: Players buy in secret.

Preparation 3: The dice are thrown to determine the location of the  Asteroids on the battlefield (Follow the rules on page 3).

Dice Roller:

-   2 and 2 is invalid because it covers a player.
-  
-  
-   1 and 1 is invalid because that part of the battlefield is not used.
-  
-  
-   6 and 5 is invalid because it prevents movement.
-  

Preparation 4: The red player is the  initial player.

Phase 1: Each player rolls the 2  dice. Starting the red.

		TS	DICE	[5]	[]		TS	DICE	[2]	[]
										

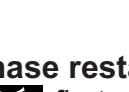

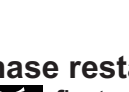

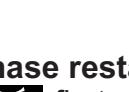

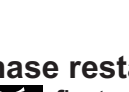

Phase 2: Secretly players draw their actions only for the first turn (given).

Example: The red player decides to do these actions in this order.

	EFFECTS	DICE	ACTIONS			
	[]	[5]	[]	[→]	[↑]	[∇]
	[]	[4]	[]	[]	[]	[]

Phase 3: The 5 actions of the first turn are carried out, in order from left to right.

	EFFECTS	DICE	ACTIONS			
	[]	[5]	[]	[→]	[↑]	[∇]
	[]	[4]	[]	[]	[]	[]
	[]	[]	[]	[]	[]	[]
	[]	[]	[]	[]	[]	[]

EFFECTS	DICE	ACTIONS			
[]	[2]	[+2]	[]	[]	[]
[]	[]	[]	[]	[]	[]

Phase restart: Now use the second dice for the second turn or if it is used, pass the  first player token to the next one and roll the  dice again.

PS: -Thanks to <https://game-icons.net/> for providing the icons for this game and Frank (Wildcard Six) for supporting corrections.

-If you dare to try it, I would appreciate your opinion, thank you.
